Digital Pen & Paper Solutions for Educators from AssistiveTek, LLC

SmartInk PDF

Print your building maintenance forms, security forms, bus maintenance forms, office logs, or I.E.P.'s or any other documents on paper- write on them with the digital pen and output them as crystal clear PDF files with signatures and annotations registered on the document-no need to scan documents. Once the form has been digitally captured you can archive or email it or save it to a secure server. SmartInk PDF requires minimal training as is a great tool for meeting compliance requirements.

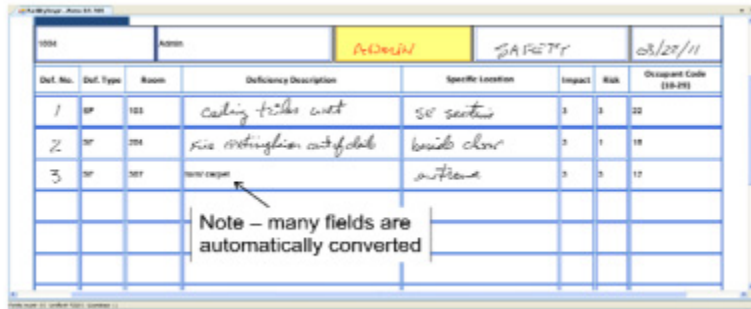

PaperShow for Teachers

Digital Pen and Paper Solution for Presentations and Teaching- excellent tool for classroom teachers who need to record and provide students with notes in classrooms where you may not have an Interactive Whiteboard. Great way to present more visually stimulating lessons and getting students engaged in the learning. All that is required is the paperShow for Teacher kit, a computer and a proejctor.

FullCircle SmartForms

Turn your paper forms and documents into data collection tools with FullCircle SmartForms. Simply write on the form and your handwriting is automatically converted to editable text ready to be stored or printed. Information from the form can be populated into a database without the need to re-key the information- think of the time savings.

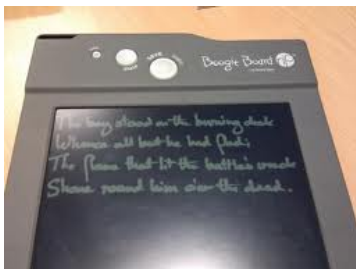

Quartet Kapture

If you are using a flip chart in your boardroom or training room then Quartet Kapture is an indispensable tool for capturing and sharing those visuals with your entire team, quickly and simply. All you need is Quartet Kapture and a computer! Quartet Kapture is ideal for capturing notes and ideas- no need for a LCD projector. Quartet Kapture works with both Mac and PC and is easy to use- no need to change the way you work when using a flip chart. Save your notes as a PDF or JPEG file and email them or put them on your website. The Quartet Kapture Starter Kit starts at $249 dollars and includes everything you will need to get started.

Boogie Board RIP LCD eWriter

The Boogie Board Rip LCD eWriter combines an exceptional paper-like writing experience with the ability to save written or drawn images as files. Connect to a computer and upload files to your PC for editing, organizing, archiving and sharing. Easily **access** and **organize** all the files created on the Boogie Board Rip LCD eWriter with Evernote's cloud sharing software. **Convert** handwritten notes on the Boogie Board Rip LCD eWriter into text files using MyScript optical character recognition software.
